

# JusTechRun Systems Inc — One Page Summary

JusTechRun Systems Inc is an AI-powered financial infrastructure and automation company, focused on CRM intelligence, compliance automation, and tokenized-asset systems for fintech operators, ministries, and multi-entity holding structures.

We build an AI-driven CRM and GRC engine that integrates multi-cloud architecture (Azure, AWS, GCP), agentic AI workflows, and audit-grade digital finance operations. Our platform automates risk scoring, reporting, tokenization preparation, and multi-entity workflow orchestration.

We are currently raising \$750,000 to fund 18 months of execution across engineering, cloud infrastructure, product deployment, compliance/security, and targeted go-to-market. The round is pre-seed, with no outside capital raised to date (bootstrapped).

Founder: Jacob Mason — CFO, Enrolled Agent, and systems architect with deep experience in SPVs, trusts, regulatory compliance, and software development.
